CORE STRENGTHS

- Logical problem-solving
- Independent research and learning
- Attention to detail
- Communication and teamwork
- Adaptability

NYSC STATUS

Completed orientation camp; seeking an ICT/IT PPA placement.

PROFESSIONAL SUMMARY

Computer Science graduate (B.Sc., Caleb University, 2025) with hands-on experience in IT troubleshooting, laptop setup, Windows configuration and software installation, backed by practical web development skills in HTML, CSS, JavaScript and Git/GitHub. Quick to research unfamiliar technical problems and patient in guiding non-technical users to a resolution. Seeking an ICT/IT support placement for NYSC service within a structured corporate environment.

TECHNICAL EXPERIENCE

Personal IT Support & Computer Setup

- Reset and configured laptops, including a device running a foreign-language Windows installation, and prepared them for use.
- Ran Windows updates and completed full system configuration after setup.
- Installed software and configured peripherals such as keyboards and printers.
- Diagnosed computer and connectivity issues, researching solutions independently for unfamiliar problems.
- Supported family members with computer and mobile-device software issues, explaining fixes in plain language.

PROJECTS

Beauty Loft Web Application HTML, CSS, JavaScript

- Built a web application for a beauty business, covering site structure, user interface and functionality.

Personal Portfolio Website Git, GitHub

- Designed and built a portfolio website showcasing projects and technical skills.
- Deployed the site and managed the codebase using Git and GitHub.

GitHub Projects

- Maintains multiple personal projects on GitHub: creating repositories, committing, pushing and pulling code, and deploying web projects.

AI-Powered Fake Review Detection System Final Year Project, 2024

- Researched fake review detection approaches for e-commerce platforms.
- Sourced and reviewed relevant datasets and existing literature.
- Responsible for project documentation, testing, progress reporting and the final presentation.
- Learned unfamiliar AI concepts independently through research.

REFEREES

Available on request.
